TREE TALK

‘More fun that Pokemon Go!’
‘One of the best things
I’ve found in lockdown’
‘Now I’ve got tree envy’
‘It's made lots of people's days better-thank
you for coming up with such a great idea, and
building it!’

2 people have liked this Tree
An ancient species of tree that was around before the Dinosaurs. It can live for centuries and is unaffected by virtually all pests and diseases. Most trees are male, but occasionally a female might be seen which has very smelly fruit in the autumn.
This Tree's value is

Greentalk asks

Greentalk is uniquely positioned to act as the first contact point for citizens wanting to explore and understand their trees.

- Tree data in the public domain
- Timely, accurate and complete
- APIs to enable frequent data updates
- Data standardisation (like the Forest Research Individual Tree Data Standard)
- Collaborative data collection and enhancement – enable the public to get involved

The future for Greentalk

- We can work with multiple data types and datasets (they don’t even need to be trees!)
- We can integrate not point specific data, e.g. weather, canopy cover etc.
- We can integrate with existing asset management systems
- We are developing a suite of public-facing features to engage and illuminate urban environments
- We can enable collaboration between people, councils and land managers
