newLEAF

CASTOR

Voices of the Future

Our woods, forests and trees belong to our children. Voices of the Future will work with young people to reimagine our treescapes.

Manchester Metropolitan U, U of Aberdeen, U of Birmingham, U of Cambridge, U of Cumbria, Middlesex U London, U of Sheffield, Natural England

MEMBRA

As humans, we don't even have to think about how to use memory. We use it naturally, but do trees have memory? University of Birmingham, University of Exeter, University of

University of Birmingham, University of Exeter, University of Leeds, University of Leicester, University of Bangor.

Connected Treescapes

Trees connect us to nature, improve our wellbeing and help tackle climate change. These connections are a key theme in Connected Treescapes. U of York, U of Strathclyde, CEH, Newcastle U, U of Derby, U of Edinburgh, FR, James Hutton Institute

Branching Out

Branching Out looks at the social and cultural values of trees and new ways to map trees with these in mind.

Loughborough University, FR, Open University, University of York, EcoLogos

newLEAF

How quickly can trees adapt to change on their own? And is human intervention needed? CEH, FR, James Hutton Institute, University of York, University of Strathclyde, University of Stirling, University of Glasgow, Robert Gordon University

CASTOR

Can woodland along rivers and waterways help us build a healthier and richer environmental landscape and fight climate change? University of Manchester, University of Cumbria, University

of Leeds, University of Nottingham, University of

Birmingham, University of Salford

Call 1 Projects

Call 2 Projects

TreE_PlaNat

Assessing stakeholder perceptions and socio-ecological consequences of woodland expansion through planting & natural colonisation. University of Stirling, University of Edinburgh, Royal Holloway UoL, Forest Research

DiversiTree

Diversifying our woodlands with native & non-native species to increase resilience to climate change, pests and diseases. James Hutton Institute, Royal Botanic Garden Edinburgh, RSPB, University of Birmingham

iDeer

Creating an Integrated Deer Management Platform that will look at the risk of deer impacts on new & existing woodlands and farmlands.

University of Reading, University of Southampton, Bangor University, Forest Research

FARM TREE

Balancing farm and landscapescale demands for integrating trees on agricultural land. University of Aberdeen, James Hutton Institute

STAND

Overcoming scale-mismatch for designing & governing treescape expansion to benefit people & nature

nature.

RSPB, Cardiff University, University of the Highlands & Islands

Agroforestry Futures

Identifying opportunities & barriers to agroforestry in the UK & co-creating pathways to achieve a sustainable transition to increased agroforestry. Newcastle University, University of Reading, University of Southampton

Call 2 Projects

NERC-funded

- Restoring Floodplain Treescapes for Flood Alleviation
- Developing good practice guidance for tree planting for urban cooling
- Treescape Regulation of Urban Environments (TRUE)
- AFFORE3ST: Advancing a planning Framework FOr Regionally Enhanced & Equitable Ecosystem Services from urban Treescapes
- Knowledge exchange with Norway to improve monitoring & management of mountain woodland restoration

Defra-funded

- Exploring wood pastures for upland UK treescapes
- Landscape restoration of wych elm through genetic & natural breeding techniques
- Securing seed supply for forest expansion

 knowledge exchange with Austria
- Addressing barriers to silvoarable & codeveloping recommendations for policy

Our Fellows

Gaps in Programme Portfolio

- Lack of focus on commercial tree species & timber production
- Economic & financial aspects of expansion, including the potential for new or expanded wood-based industries & tree nurseries
- Supply of resilient & biosecure planting stock
- Hedgerows/TOW risks, benefits, future management for resilience
- Ecological, social, economic & cultural impacts of tree pests & diseases
